PROFILE

Junior MERN Stack Developer with hands-on experience working in a digital agency and building real client websites and full-stack applications. Skilled in React, Node.js, Express, and MongoDB with practical exposure to production codebases, deployment workflows, and collaborative development. Passionate about building responsive, user-focused web applications and continuously improving development skills.

PROFESSIONAL EXPERIENCE

Trainee / Junior Web Developer — Highphaus Digital Agency
Jan 2026 – Present

- Contribute to real client and company websites in a fast-paced startup environment
- Worked on a live dropshipping e-commerce platform, fixing UI issues and improving usability across responsive breakpoints
- Collaborate with designers and senior developers to implement new features and deploy updates
- Gain hands-on experience with Git workflows, testing, debugging, and deployment processes
- Build and customize websites based on client requirements under tight deadlines

PROJECT

Highphaus — Company Website (Production)

- Contributed to development and deployment of the company website
- Built responsive UI sections and improved cross-browser performance
- Assisted in testing, bug fixing, and deployment workflow

Slook — E-commerce Website (Client Project)

- Developed and customized a production e-commerce site
- Built responsive components and improved product browsing UX
- Fixed layout issues and optimized mobile and desktop performance

Cartly — MERN E-commerce App (Personal Project)

- Built full-stack e-commerce app with auth, cart, and checkout
- Developed REST APIs for products, users, and orders
- Created admin dashboard for store management

Blogify — Blog Management System (Personal Project)

- Built full-stack blog platform with CRUD and admin moderation
- Integrated frontend with backend APIs and database operations

EDUCATION

Bachelor of Computer Applications (BCA)
Indira Gandhi National Open University
Distance Education
2025 – Present | Expected Graduation: 2028
